Overview of the Building Permit Process

A BUILDING PERMIT is required for all "like activity" that is performed with respect to any "facility".

"Like activity" means construction or any work involving or similar to construction that is performed with respect to any "facility" of a school district subject to the requirements of 23 Illinois Administrative Code Part 180. This includes but is not limited to reconstruction, substantial alteration, repair, remodeling, renovation, or change in use.

"Facility" means land, buildings, structures and improvements other than buildings, and permanent, fixed equipment attached to or incorporate in any buildings, and permanent, fixed equipment attached to or incorporated in any building owned or used for school purposes by a school district subject to Part 180. This definition excludes facilities owned by a school district but not used for public school purposes, which shall be subject to local building

Repairs that qualify as "Minor repairs" shall not be considered "like activities" and therefore are not subject to the BUILDING PERMIT requirements of <u>Part 180.200</u>.

"Minor repairs" means any work to a facility that is not subject to the bidding requirements of Section 10-

20.21 of the School Code, with the following exceptions: cutting away of any wall, partition, or portion thereof; cutting or removal of a structural beam or load-bearing support; removal of a change in a required means of egress; rearrangement of parts affecting exit requirements; addition to, alteration of, replacement, or relocation of any standpipe, drain leader, or gas, soil, waste, water supply sewer drainage, vent or similar piping; electrical wiring; or mechanical; or other require building system."
Therefore, if either one of the following applies to your project, you must complete the APPLICATION FOR BUILDING PERMIT and submit it to the Regional Office of Education:
□ Project is \$50,000 or more and includes work involving or similar to construction that is performed with respect any facility including but not limited to reconstruction, substantial alteration, repair, remodeling, renovation, or change in use.
□ Project is less than \$50,000 but involves any of the following: □ Asbestos; □ a change or increase in the size, type, or extent of an existing facility; □ cutting away of any wall, partition, or portion thereof; □ cutting or removal of a structural beam or load-bearing support; □ removal of, or change in a required means of egress; □ rearrangement of parts affecting exit requirements; □ addition to, alteration of, replacement, or relocation of any standpipe, drain leader, or gas, soil, waste, water supply, sewer drainage, vent or similar piping; □ electrical wiring; or □ mechanical; or □ other required building system.

After examination and approval of the project, including appropriate construction documents, applicable PLAN REVIEW STATEMENTS and CONFIRMATION OF PLAN REVIEW RECORDS, a BUILDING PERMIT will be issued by the Regional Superintendent using the steps and forms on the following page.

Steps and Forms in the Building Permit Process

Step #1: Design professional develops construction documents with affixed seal and signature per School Board request. School board gives approval, prepares APPLICATION FOR BUILDING PERMIT and submits it, along with two copies of all signed and sealed plans and specification, PLAN REVIEW STATEMENT and the CONFIRMATION OF PLAN REVIEW RECORDS to the Regional Superintendent.

36-10: APPLICATION FOR BUILDING PERMIT (Page 3)

36-11: PLAN REVIEW STATEMENTS (Page 4) - Required for the Illinois Boiler and Pressure Vessel Safety Code, and the Illinois Plumbing Code as applicable to the project. Since the Illinois Accessibility Code Section 400.180 specifically allows the seal of the design professional to be submitted in lieu of the "Statement of Compliance", additional signoff for the Accessibility Code is not required on the form. The form provided also includes checks for other Illinois State Agency requirements.

<u>35-66</u>: <u>APPLICATION FOR VARIANCE (Page 5)</u> When determined to be necessary, design professionals may apply to Regional Superintendent for a variance pursuant to 180.70 on behalf of the school district.

<u>36-35</u>: <u>CONFIRMATION OF PLAN REVIEW RECORDS (Page 6)</u> - The Regional Superintendent may use this form to confirm that plan review records have been reviewed by he/she prior to issuing the building permit.

<u>PLAN REVIEW RECORDS</u> – to be completed and maintained by individuals qualified in accordance with 180.100 for the 2024 International Building Code (including appendix K – International Electrical Code), the 2024 International Energy Conservation Code, the 2024 International Fire Code, the 2024 International Mechanical Code and the 2024 International Fuel Gas Code.

Step #2: The Regional Superintendent (or designee) issues a BUILDING PERMIT and returns one set of the plans and specifications, with the REGIONAL SUPERINTENDENT'S APPROVAL IN WRITING affixed. The BUILDING PERMIT, and the approved plans and specifications should be kept at the site of work to serve as a basis for all subsequent inspections.

36-14: BUILDING PERMIT (Page 7)

36-13: REGIONAL SUPERINTENDENT'S APPROVAL IN WRITING (Page 8) affixed to the plans and specifications.

Overview of the Certificate of Occupancy Process

A CERTIFICATE OF OCCUPANCY is required for all facilities that are occupied by the school district. It is the responsibility of the Local School Board to ensure that no "facility" is occupied before the regional superintendent has issued a CERTIFICATE OF OCCUPANCY. "Facility" is defined as land, buildings, structures and improvements other than buildings, and permanent, fixed equipment attached to or incorporated in any building owned or used for school purposes by a school district subject to this Part. This includes vehicular facilities, playgrounds, parking lots, stadiums, etc.

An APPLICATION FOR OCCUPANCY must be submitted:

- 1) When a school board wishes to occupy any facility.
- 2) When work covered by a BUILDING PERMIT for a newly constructed facility is complete or when work covered by a building permit for an existing facility that has affected* an existing CERTIFICATE OF OCCUPANCY is complete. INSPECTION STATEMENTS and the CONFIRMATION OF CALLED INSPECTION RECORDS must be submitted to, and CALLED INSPECTION RECORDS must be reviewed by the Regional Superintendent during and/or upon completion as applicable to the work.
 - *When work covered by a BUILDING PERMIT for an existing facility that has <u>not</u> affected an existing CERTIFICATE OF OCCUPANCY is complete, INSPECTION STATEMENTS and the CONFIRMATION OF CALLED INSPECTION RECORDS must be submitted to, and CALLED INSPECTION RECORDS must be reviewed by the Regional Superintendent during and/or upon completion as applicable to the work. Completion for work (not affecting the existing Certificate of Occupancy) is certified by the district and the design professional upon submittal of the STATEMENT OF COMPLETION to the Regional Superintendent.
- 3) When a school board wishes to occupy a facility on a temporary basis that does not comply fully with all the requirements of Part 180. Application must include TEMPORARY FACILITY REPORT (includes Temporary Facility Elimination Plan and Temporary Facility Checklist).

In response to an APPLICATION FOR OCCUPANCY and depending upon the type of Certificate applied for, the Regional Superintendent issues the following types of certificates when satisfied that all requirements have been met.

- GENERAL CERTIFICATE OF OCCUPANCY is issued 1) when a school board wishes to occupy a facility 2) when work covered by a BUILDING PERMIT for a newly constructed facility is complete or when work covered by a building permit for an existing facility that has affected an existing CERTIFICATE OF OCCUPANCY is complete.
- CERTIFICATE OF PARTIAL OCCUPANCY is issued when work covered by a BUILDING PERMIT is not entirely
 complete, provided the regional superintendent's inspection indicates that the areas requested to be occupied can be
 occupied safely prior to full completion.
- CERTIFICATE OF OCCUPANCY FOR A VEHICULAR FACILITY is issued for a vehicular facility, provided that the facility is licensed and/or titled as required by applicable provisions of the Motor Vehicle Code and rules promulgated by the Secretary of State or the Department of Transportation; and the Regional Superintendent has inspected the vehicular facility and found that it does not pose a serious threat to the life or safety or its occupants.
- CERTIFICATE OF OCCUPANCY FOR A TEMPORARY FACILITY is issued for one year only 3) when a school board
 wishes to occupy a facility that does not comply fully with all the requirements, provided that all the requirements on the
 application and TEMPORARY FACILITY REPORT are acceptable to the Regional Superintendent.

(3/11) Overview of Certificate of Occupancy Process

Steps and Forms for the Certificate of Occupancy Process

Step #1: During and/or upon completion of construction or like activity, the Regional Superintendent (or designee) ensures that called inspections are conducted as required by the 2024 International Building Codes (including appendix K – International Electrical Code), the 2024 International Energy Conservation Code, the 2024 International Fire Code, the 2024 International Mechanical Code and the 2024 International Fuel Gas Code.

<u>36-37: CONFIRMATION OF CALLED INSPECTION RECORDS (Page I-13)</u> – a form required to be submitted to the Regional Superintendent to confirm completion and review of all CALLED INSPECTION RECORDS applicable to the project.

<u>CALLED INSPECTION RECORDS</u> – forms used during a called inspection to capture information regarding compliance and noncompliance with approved plans and specifications and relevelant codes that is prepared and signed off and maintained by the design professional or a qualified inspector.

Step #2: When a school board wishes to occupy a facility, or continue to occupy a facility after work has been completed, the following must be submitted to the Regional Superintendent.:

36-15: APPLICATION FOR OCCUPANCY (Page I-11) and attachments when applicable:

<u>36-36: INSPECTION STATEMENTS (Page I-12)</u> – three statements submitted by the design professional to confirm that any required inspections have been conducted in accordance with the Illinois Plumbing Code, the Illinois Boiler and Pressure Vessel Safety Code, and the Illinois Elevator Safety Act, as applicable to the project.

<u>36-37: CONFIRMATION OF CALLED INSPECTION RECORDS (Page I-13)</u> – a form required to be submitted to the Regional Superintendent to confirm completion and review of all CALLED INSPECTION RECORDS applicable to the project.

<u>36-26</u>: <u>TEMPORARY FACILITY REPORT (Page I-17)</u> - (includes Temporary Facility Elimination Plan and Temporary Facility checklist) - must be completed/submitted initially and annually to the Regional Superintendent.

Step #3: When an APPLICATION FOR OCCUPANCY is received by the Regional Superintendent or designee, he or she reviews the application, if applicable the INSPECTION STATEMENTS, THE CONFIRMATION OF CALLED INSPECTION RECORDS and CALLED INSPECTION RECORDS, if applicable the TEMPORARY FACILITY REPORT (includes Temporary Facility Elimination Plan and Temporary Facility Checklist), the safety reference plans and then conducts a final inspection. When satisfied that all requirements are met, the Regional Superintendent (or designee) signs the APPLICATION FOR OCCUPANCY and issues one of the following certificates depending on the type of application being submitted:

- 36-16: GENERAL CERTIFICATE OF OCCUPANCY (Page I-14)
- 36-17: CERTIFICATE OF PARTIAL OCCUPANCY (Page I-15)
- 36-28: CERTIFICATE OF OCCUPANCY FOR A VEHICULAR FACILITY (Page I-16)
- 36-30: CERTIFICATE OF OCCUPANCY FOR A TEMPORARY FACILITY (Page I-20)

Overview of the Annual Inspection Process

The primary purpose of an annual inspection is to ensure that schools are safe, sanitary, and fit for occupancy. It may also serve to confirm that school boards are making reasonable progress with previously issued orders to effect compliance.

By law, all public-school buildings and facilities must be inspected at least once each year by the Regional Office of Education. This includes facilities that are leased or rented by the district and used for school purposes. The extent and detail involved in an inspection depends upon the nature of the facility to be inspected. Factors such as use, size, complexity, age, previous conditions, etc., should be taken into consideration in planning and conducting inspections.

Districts must maintain their school buildings in continuous compliance with minimum standards and be inspected annually. During the course of the year, a particular facility may be inspected at the discretion of the Regional Superintendent. Facilities may be inspected more frequently if the Regional Superintendent determines that it is necessary to do so.

105 ILCS 5/3-14.21

Steps and Forms in the Annual Inspection Process

Step #1: The Regional Superintendent (or designee), develops the schedule of ispections and notifies the district. If feasible, the schedule of inspections <u>SHALL</u> be coordinated with the annual fire safety inspections that are conducted by OSFM qualified fire officials.

36-18: NOTICE OF ANNUAL INSPECTION (Page II-3)

Step #2: The Regional Superintendent (or designee), who has taken a course, conducted by IARSS, regarding the annual inspection process visits each facility* owned or used for school purposes by a school district and communicates any violations on the HEALTH LIFE SAFETY ANNUAL INSPECTION CHECKLIST. The inspector uses the HEALTH LIFE SAFETY GLOSSARY and the BUILDING CODE MATRIX to identify the applicable code sections. In addition, previously noted violations are inspected to determine and record the progress made on their correction.

* "Facility" means land, buildings, structures and improvements other than buildings, and permanent, fixed equipment attached to or incorporated in any building owned or used for school purposes by a school district subject to this Part. This definition excludes facilities owned by a school district but not used for public school purposes, which shall be subject to local building codes.

35- 18: HEALTH LIFE SAFETY ANNUAL INSPECTION CHECKLIST AND GLOSSARY (Page II-4)

35-11: BUILDING CODE MATRIX (Page II-4)

Step #3: The Regional Superintendent (or designee) shall address violations and unsafe conditions found during the annual inspection by serving a notice of the violation or unsafe condition using the FIELD NOTICE OF VIOLATIONS OR UNSAFE CONDITIONS, and ordering the condition or materials to be corrected*, placed out of service** or removed within a specified period of time, which shall in no case exceed the timelines set forth in Section 2-3.12. (180.400)

36-19: FIELD NOTICE OF VIOLATIONS OR UNSAFE CONDITIONS (Page II-5)

- *The regional superintendent may require a school board to have a facility surveyed by a licensed design professional if, in the judgment of the regional superintendent, such a survey is necessary to determine compliance. (180.400 a))
- **Any device or equipment placed out of service by the regional superintendent shall be plainly marked with a sign or tag, which shall not be tampered with, defaced or removed except by the regional superintendent. (180.410)

Step #4: The Regional Superintendent prepares a written report of the results of the annual inspection before July 30th of each year, using the IWAS - H/LS processing system. The report is submitted to ISBE via IWAS, and can be viewed and printed by school district personnel and design professionals who are authorized by the district superintendent.

Step #5: The Regional Superintendent also prepares a report annually on or before October 1, summarizing all of the transactions relating to the administration and enforcement of this Part for the fiscal year ended on the preceding June 30. The report is submitted to ISBE via IWAS, and can be viewed and printed by the Regional Superintendent and ISBE.

Facility: In accordance with Part 180.30, "facility" means land, buildings, structures and improvements other than buildings, and permanent, fixed equipment attached to or incorporated in any building owned or used for school purposes by a school district subject to this Part. This definition excludes facilities owned by a school district but not used for public school purposes, which shall be subject to local building codes" [and the Office of the State Fire Marshal's adoption of NFPA 101-*Life Safety Code*]

Private facilities serving special education students where the public school district has certified that it is unable to serve said students—Health and Life Safety Code no longer applies; under Section 401.220(a), the Office of the State Fire Marshal will enforce its fire code and the local enforcement authority will enforce its local building code.

If the private organization is located in a public school building that is owned or leased by the school district and the program serves public school students, that facility must comply with the ISBE Health/Life Safety Code.

If a private organization leases from a public school district building, but does not serve public school students, that facility (the area of the building where the private organization is housed only) must comply with the OSFM's adoption of NFPA 101-*Life Safety Code* and the locally adopted code.

REGIONAL SUPERINTENDENT'S ANNUAL REPORT via IWAS

Instructions for Completing

Regional Superintendent's Annual Report

- Building Permit Date: Enter the date of any building permits issued for that facility. 180.200
- 2 **Completion Date:** Enter the date of completion of the work for which the building permit was issued.
- 3 **Certificate Type:** Enter the type (General, Partial, Temporary, Vehicular) of Certificate of Occupancy issued.
- 4 Certificate Date: Enter the Certificate of Occupancy issue date. 180.230
- Date of Annual Inspection: Enter the date in which the Annual Inspection was conducted for facility. 180.300
- 10 Year Receipt Date: Enter the date in which the 10 year Survey was received by the Regional Superintendent for the School Building. 180.310
- 7 **Amendment Number:** Enter the number assigned to any amendments received for that facility. 180.500
- 8 ISBE Approval Date: Enter the Certificate of Approval date for the amendment received.
- 9 **H/LS Work Status**: Enter the status (completed, started, not started) of H/LS work identified in ten year survey and/or amendment.
- Annual Review by June 30: Enter "yes" if the district conducted an annual review of their School Emergency and Crisis Response Plans for each school building by June 30th of the fiscal year for which you are reporting. Enter "no" if they have not. SSDA 105 ILCS 128

Overview of the Ten Year Safety Survey Process

Every 10 years, each local board is required to **survey** its school buildings* and **effectuate** any recommendations in accordance with 2-3.12, the Health Life Safety Code, and with the guidance of this Chapter. * "School Building" or "School" means a building occupied in whole or in part by public school students or intended for occupancy by such students.

Local School Board

- 1. **Hires** a design professional (Design Professional licensed in the State of Illinois) to survey and report on the safety of its school buildings every ten years.
- 2. **Reviews** the Safety Survey Report submitted by the design professional, identifying the violations (or those future violations if not remedied within the next 12 months) of the Health Life Safety Code for Public Schools, Part 180 and approves the recommendations for corrective action.
- 3. **Prioritizes** the time assigned to each item to complete any urgent, required or recommended work contained in the Safety Survey Report.
- 4. Authorizes the design professional to access the IWAS HLS Processing System through the district superintendent.
- 5. **Receives** IWAS "design professional approved" Ten Year Safety Survey Report (and HLS amendment, if submitted simultaneously).
- 6. **Approves** and **submits** the Ten Year safety Survey Report (and HLS amendment, if submitted simultaneously) to the Regional Superintendent through the IWAS HLS processing system.
- 7. **Requests** the design professional to prepare and proceed with all the necessary documents for bidding purposes, if subject to bidding requirements of Section 10-20.21 of the School Code.
- 8. **Reports** to the Regional Superintendent annually, the progress towards the completion of any recommendation to effectuate compliance with the Health/Life Safety and Building Codes.

Design Professional (Design Professional licensed in the state of Illinois)

- 1. Surveys buildings to identify violations of the Health Life Safety Code for Public Schools, Part 180.
- 2. **Enters** the Ten Year Safety Survey Report in the IWAS HLS processing system. In addition, **sends** the safety reference plans with the description of existing building and site conditions to the Regional Superintendent and ISBE. Note: These documents and all other required or requested documents may be sent by mail or by email (in PDF format).
- 3. Requests "design professional" authority access to IWAS from the district superintendent.
- 4. Creates IWAS login name that is unique to the district.
- 5. **Submits** an Application for Approval of a Ten Year Survey, and **certifies** by seal and signature on the application form that states that, "to the best of his/her knowledge, the recommendations and estimated costs to abate the violations are true and accurate," and that funding type is not included in the calculation. (If determined by the district that fire prevention and safety funds will be needed to complete the work, an original Certification of Need with wet signature and seal is mailed to the District, the Regional Superintendent and to the State Superintendent.)

Regional Superintendent

- 1. **Checks** the accuracy and completeness of the Safety Survey Report submitted, including the safety reference plans with description of existing building conditions.
- 2. **Approves** and **submits** the Ten Year Safety Survey (combined with a Health/life Safety amendment, when the use of Fire Prevention and Safety Funds is requested) to the State Superintendent of Education.

State Superintendent on the Approval/Disapproval of the Ten Year Safety Survey Report:

- 1. **Checks** the completeness of the Safety Survey Report submitted, the violation and recommendation schedule(s), including the safety reference plans with description of existing conditions.
- 2. **Checks** the accuracy of the referenced code sections, as well as the priority and estimated timelines for completing the work.
- 3. **Determines** authorization of fire prevention and safety funds to be used for each work item listed on the Schedule of Violations (if report is submitted with an amendment).
- 4. **Approves** or **denies** all or part of the report.
- 5. **Issues** a Certificate of Approval for the ten year survey (and if combined with an amendment, authorizes the approval of fire prevention and safety funds to be used).

Note: When the Certificate of Approval is signed by the State Superintendent, the certificate will be available through IWAS to be viewed and printed by the design professional, school district, ROE or ISBE.

Steps and Forms in the Ten-Year Survey Process

See IWAS HLS INSTRUCTION MANUAL

SAMPLE DESCRIPTION OF EXISTING CONDITIONS

(Name of School)

I. GENERAL

ENROLLMENT: High school grades 9 through 12, 860 students. Status of

enrollment-static.

CONSTRUCTION: Type II - Noncombustible; IV - Ordinary; V-Wood frame. See

Plot Plan.

MEANS OF EGRESS: Adequate in arrangement, size, and protection except where

otherwise mentioned in this report.

LOCAL FIRE ALARM SYSTEM: No automatic telephone dialer.

NEAREST FIRE STATION: Volunteer fire department within 5 blocks.

CITY WATER: 4' service entering building from 6' main in Madison Street.

Metered in Room 138.

II. CONSTRUCTION DETAILS

YEAR BUILT: Refer to plot plan. Original building 1910 (demolished for 1970)

addition). East and west wings attached to original building – 1915; original gym – 1937; northwest addition (shops and home economics) 1951; classroom unit and boiler house – 1958; gymnasium (new) 1961; cafeteria expansion – 1963; library- 1970; vocational education, locker rooms, multipurpose room, boiler room – 1974; 1951. Addition remodeled

in 1974.

HEIGHT: Two stories maximum. See Plot Plan.

GROUND FLOOR AREA: 108,629 square feet in main buildings plus 2,520 square feet

in concession building under the bleachers.

EXTERIOR WALL

CONSTRUCTION: 1915 original buildings and 1937 addition – brick face with tile

back-up: 1951 addition and concession building – 8' concrete blocks. 1958, 1961, 1963, 1970, 1974 additions brick face with concrete block back-up. Portion of 1970 addition has 10'

concrete blocks.

FLOOR CONSTRUCTION: All lower floors – concrete slab on grade 1915, 1937 and 1951

additions – upper floors of wood joists, sub floor, and wood finish floor. Tile or carpet finish. $1958,\,1961,\,1963,\,1970,\,$ and

1974 additions concrete on steel joists.

ROOF CONSTRUCTION: 1915 additions – slate shingles on wood sheathing on wood

rafters. 1937 addition built-up roof on 246 wood sheathing on wood purlins on steel bowstring trusses. 1951 addition and concession building built-up roof on will sheathe on wood joists (flat). 1958, 1961 and 1963 additions built-up roof on gypsum roof deck on insulated form board on steel joists. 1970 additions – built-up roofing on cementious wood fiber deck on steel hoists all areas except locker rooms and boiler room. Locker rooms are built-up roofing on insulation on precast

INTERIOR WALL CONSTRUCTION:

concrete deck. Boiler room is built-up roofing on insulation on metal deck on steel joists.

1915, 1937, and 1951 additions – plaster on wood and gypsum lath. 1958, 1961, 1963, 1970 and 1974 additions – concrete blocks. Some wood stud walls with wood fiberboard paneling and or pegboard.

The interior walls of the 1958 classroom addition cause the construction to become Type V (see Rule 185.390b6b). This limits maximum fire areas to 9000 square feet on the first floor and 6000 square feet on the second floor.

See recommendations for fire labeled doors and smoke screens to subdivide the building.

Painted plaster or concrete blocks. Some interior walls are

face brick. Some wood paneling on stud walls with either

drywall or wood fiberboard back up.

TRANSOMS AND CEILING-

INTERIOR FINISH:

LEVEL GLASS: Fixed glass except door 213 which is wire mesh and door 300

which is two layers of 1/4" paneling.

III. <u>EGRESS FACILITIES</u>

GRADE EXITS: Adequate and well arranged. Panic hardware needs repair in

certain location as noted herein. Some exit doors with panic

hardware should be adjusted for ease of operation.

CORRIDORS: Adequate width, height and protection except 1958 additions.

See subsequent recommendations.

STAIRWAYS: (See plans for numbering.) Stairs 1, 2, 11, 12, 31, 32 are wood

construction. Stairs 3, 4, 8, 13, 14, 15, 20, 21, 22, 23, 24, 27, 28, 33, are concrete. Stairs 5, 6, 7, 9, 10, 16, 17, 25, 26, 29, 30 are of metal perforated metal treads. Stairs widths, risers, pan filled with concrete. Stairs 18 and 19 gave treads and handrails meet code requirements except where mentioned in

recommendations.

WINDOWS: Available as secondary means of escape from classroom

Number 76 in 1958 addition.

FIRE ESCAPE: None.

EXIT SIGNS: Exit lights are adequately located. Some units require new

lamps

EMERGENCY LIGHTING: Battery operated emergency lights are located as shown on the

drawings.

IV. SPECIAL OCCUPANCIES

MULTI-PURPOSE ROOM: 1937 addition (gymnasium) now used as auditorium.

Separated from remainder of school with solid core wood doors and masonry walls. Doors are lockable to ingress. Separation from the rooms below the stage and seating area is inadequate. See recommendations. Proscenium opening provided with stage curtain and valance that is fireproofed. No

fly gallery. No heat detector required per Rule 185.390j3.

GYMNASIUM: 1961 addition – separated from remainder of school with solid core wood doors and masonry walls. Doors have hold opens

,

and doors, which are lockable to ingress. Exit capacity is 1800 people (limited by 60% of occupancy exit through corridor 144).

BOILER ROOM:

Completely separated from remainder of school facility except for one common concrete block wall.

MECHANICAL EQUIPMENT & STORAGE ROOMS:

Openings into corridors protected by doors as shown ondoor schedule. See sub- sequent recommendations for installing fire detectors.

V. UTILITIES

HEATING PLANT:

Two steam boilers heat all but the 1970 addition. The original boiler is a Kewanee Type C, Model 7L84 with two Iron Fireman burners of 3,500,000 BTU input capacity. Fuel supply piping and devices are in code compliance except for heat detector wired to gas valves. This boiler is used only as a back up to the new boiler.

The boiler in the 1974 edition is a Kewanee Type L3S-200-60 steam boiler. The burner is a Kewanee Type KF combination oil/gas unit of 8,370,000 BTUH gas and 59.8 gallons per firing rates. Fuel supply piping and devices are in code compliance. The library (1970) addition is heated and cooled by three natural gas fired rooftop furnaces. The two classrooms on the second floor of this area have individual classroom gas fired unit ventilators. Each unit is in code compliance.

HEAT DISTRIBUTION:

The method of heat distribution is a two-pipe low pressure steam distributed to radiators and slope top fin tube in the 1915 sections. These devices are automatically controlled in the classrooms and manually controlled in all other areas of these building sections. Steam is distributed to unit heaters in the 1937 section as well as to radiators. These devices are automatically controlled. The 1958 and 1963 classroom and cafeteria sections utilize a steam to hot water converter to heat these sections through slope top fin tube. The converter in located in Room 138 and lacks certain safety devices. The 1951 and 1974 additions are heated by hot water created from a steam heat exchanger located in Room Number 194. There are Unit ventilators and finned tube convectors each with automatic temperature controls in these areas.

VENTILATION:

Ventilation is adequate for all classrooms in the 1958 addition, 1951 and 1937 gymnasium addition due to the area of openable windows (Rule 185.457b1).

Power exhaust is provided for all restrooms and locker rooms. The kitchen is provided with 3500 cfm of exhaust over the range and ovens and 940-cfm over the dishwasher. The industrial shops have individual exhaust connections to the dust-producing equipment as well and the exhaust systems meet all Code requirements for their particular area. The foundry area 05 lacks an exhaust hood over the two kilns.

AIR CONDITIONING:

None.

WATER HEATER:

Domestic hot water is provided by a 920-gallon storage tank heated by a gas-fired water heater of 199,000 BTU input. An additional 8-gallon natural-gas-fired water heater is located in the kitchen area of the 1958 and 1963 addition. An additional 8-gallon, electric water heater is located in the art room. The temperature of water in the storage tank is 150 F.

INCINERATOR: None.

GAS SERVICE: Natural gas enters the building on the east side of the boiler

room where it is metered, pressure regulated and provided with an outside shut-off. The gas piping runs above the ceiling of the 1958-63 cafeteria-kitchen addition. This area is unvented and must be brought into line with Rule 185.485cas per our

recommendations.

ELECTRICAL SYSTEM: Electric service is underground, rated 208/120 volt, 3 phase, 4

wire. The main service has a maximum demand of 800 ampere and is capable of 2000 ampere. The non-metallic sheathed cable used in some of the recent remodeling work is not in conformance with Code requirements. Lighting in all areas is above the minimum standard as set up by the Code.

PLUMBING: There are adequate numbers of plumbing fixtures in this

facility. Several fixtures have been removed or destroyed and

the waste pipes are still open to the atmosphere.

Sewage disposal through 2-6' tiles to the municipal sanitary

sewer system.

Main located along the westerly property line.

VI. PRIVATE PROTECTION

FIRE ALARM SYSTEM: A non-coded, continuous-ringing, supervised fire alarm system

with main control panel located in Office 114, consisting of break-glass stations and horns, presently exists in this building. Certain additions must be made to this system in order to meet

the requirements of the "Building Specifications."

AUTOMATIC SPRINKLERS: There are no sprinklers in this building.

AUTOMATIC HEAT DETECTION: There are automatic heat detectors located as indicated in the

drawings.

STANDPIPE HOSE LINES: None.

FIRE EXTINGUISHERS: Portable fire extinguishers are located as indicated on the

drawings. These extinguishers and their location meet all requirements of NBFU #10 except for the concession building.

VII. SECURITY SYSTEM None.

VIII. <u>ENERGY CONSERVATION</u> The only energy conservation measure now in use is the set

back of thermostats when the building is not occupied. Consideration should be given to further procedures once the

building is in compliance with prevailing codes.

IX. ASBESTOS ABATEMENT The building is currently in compliance with the approved

asbestos management plan.

X. LEAD-BASED PAINT Peeling paint was observed in some rooms in the older

sections of the building. Tests should be made to determine if lead-based paints exists, particularly in rooms having small children in attendance. Lead-based paint should be removed

from rooms occupied by small children.

XI. PAVING Drives, parking lost and sidewalks are in

good condition as a result of an extensive

Overview of the Health Life Safety Amendment Process

Any local school board that wishes to use Fire Prevention and Safety Funds to finance the repairs or alterations to any school building is required to file a "Request for Authorization" (i.e. an "amendment") to respond to findings of:

- a district-initiated inspection (180.40),
- an annual inspection conducted by the regional superintendent (180.300),
- a decennial inspection (180.310),
- a lawful order of any agency, other than a school board, having authority to enforce any school building code applicable to any facility that houses students, or any law or regulation for the protection and safety of the environment, pursuant to the Environmental Protection Act,
- a citation by a local fire department or fire protection district (105 ILCS 5/2-3.12), or
- errors and/or omissions found in a previously approved amendment.

Local School Board

The local school board, guided by The Local Government Professional Services Selection Act Section 50 ILCS 510/0.01, is required to hire a licensed design professional to assist the district in correcting the violations using the school building code known as "Health/Life Safety Code for Public Schools," Part 180.

- 1. submits to the county clerk the following documents: Certificate of Tax Levy, State Certificate of Approval, Order to Effect, and the Regional Superintendent's Certificate of Approval to levy the tax, if Operations and Maintenance funds or existing Fire Prevention and Safety Funds are insufficient.
- 2. applies for a building permit at the Regional Office of Education, if required.
- 3. authorizes the design professional to proceed with all the necessary documents for bidding purposes, if subject to the bidding requirements of Section 10-20.21 of the School Code.
- 4. ensures that the proposed work is scheduled and completed.
- 5. obtains an occupancy permit from the regional superintendent, (if a building permit was required).

Licensed Design Professional (Design Professional)

- 6. inspects buildings for violations, repairs or alterations.
- 7. prepares a report of the inspections.
- 8. certifies that to the best of his/her knowledge, the recommendations and estimated cost to abate the violations are true and accurate and submits an original certificate of approval with their wet seal and signature to the Regional Superintendent and to the State Superintendent.
- 9. oversees the project until completion.
- 10. certifies that the work was completed as approved.

Regional Superintendent

- 3. checks the reasonableness of estimated costs and timelines in regards to completing the proposed work.
- 4. inspects the facility, if necessary, to verify the information provided by the licensed design professional.
- 5. submits the amendment through the IWAS HLS system to ISBE.
- 6. issues an order to effect recommendations of the licensed design professional.
- 7. issues the Regional Superintendent's Certificate of Approval
- 8. ensures that "required" work is scheduled and completed within 5 years,
- 9. ensures that "urgent" work is completed as soon as possible, and no later than in 1 year.
- 10. issues Building Permits & Certificates of Occupancy as needed.

State Superintendent on the Approval/Disapproval of Health/Life Safety Amendment:

- 6. checks the accuracy and completeness of the amendment as well as the reasonableness of estimated costs
- 7. determines if the items qualify under the provisions of the Illinois School Code Section 17-2.11.
- 8. approves or denies all or part of the recommendations itemized in the amendment.
- 9. issues Certificate of Approval for the proposed work that is signed by State Superintendent and available through IWAS to view and print by the licensed design professional, school district, ROE or ISBE.

Form 36-22 (3/04) (Prescribed by the Regional Superintendent for the Use of the Regional Superintendent)

Overview of the Condemnation/Demoliton Process

A school building must be condemned anytime the regional superintendent feels that the building is in such a state that occupancy by students and personnel will, without question, jeopardize their lives. The regional superintendent must also request the assistance of the Illinois Department of Public Health and/or State Fire Marshal to confirm the hazardous condition of the school building.

Section 105 ILCS 5/3-14.22 of the School Code states:

Sec. 3-14.22 Condemnation of school buildings. To request the Department of Public Health, the State Fire Marshal or the State Superintendent of Education to inspect public school buildings and temporary school facilities which appear to him to be unsafe, unsanitary or unfit for occupancy. These officials shall inspect such buildings and temporary school facilities and if, in their opinion, such buildings or temporary facilities are unsafe, unsanitary or unfit for occupancy, shall state in writing in what particular they are unsafe, unsanitary or unfit for occupancy. Upon the receipt of such statement the regional superintendent shall condemn the building or temporary facility and notify the school board thereof in writing and the reasons for such condemnation. He shall also notify, in writing, the board of school trustees that the school or temporary facility so condemned is not kept as required by law.

The provisions of this Section shall not preclude inspection of school premises and buildings pursuant to Section 9 of the Fire Investigation Act [425 ILCS 25/9], although not requested as herein above provided. (Source P.A. 84-25; 87-984, § 1.)

Some of the reasons for condemnation of a school building are fire, natural disaster and extremely poor maintenance. To condemn a building does not mean that the building will be demolished. There are times when the district will be able to bring the condemned building back into compliance with the Health/Life Safety Code.

ORDER OF CONDEMNATION

Demolition of School Facilities

(Permanent or Temporary)

The procedures in securing a demolition permit are as follows:

- Step 1. The owner/district shall notify all utility companies having service connections within the structure such as water, electric, gas, sewer, etc.; the Illinois Department of Public Health; and the Office of the State Fire Marshal of the existence of hazardous materials and the planned demolition.
- Step 2. All owners of adjoining buildings or lots (not across a street) must be notified in writing regarding the intended demolition. This allows the adjacent property owner the opportunity to bring any special conditions to the attention of the code official prior to demolition.
- Step 3. Apply for a permit for demolition at the Regional Office of Education. (Note: Attach to the application, a copy of the notice to other adjacent owners, and releases from IDPH, OSFM, UST, and the utility companies stating that their respective service connections and appurtenant equipment, such as meters and regulators, have been removed or sealed and plugged in a safe manner).

Form Required:

- Form 36-33 Application for Demolition Permit (Page 6-5)
- Step 4. The Regional Office of Education conducts inspection of the site before permit issuance. (Page 6-6)
- Step 5. The Regional Office of Education issues a demolition permit, if appropriate. Regional Superintendent shall model the demolition permit after the Chapter 1, For 36-14 Building Permit -- page 1-10)
- Step 6. Make inactive in Facility inventory.
- Step 7. If new construction (permanent building) comply with Chapter 1, School Construction Process.

Regional Superintendent Demolition Inspection Checklist

1. Site plan: Verify that the application for demolition permit be accompanied by a site plan showing to scale the size and location of all existing structures on the site, distances from lot lines, the established street grades and the proposed finished grades; and it shall be drawn in accordance with an accurate boundary line survey. The site plan shall show all construction to be demolished and the location and size of all existing structures and construction that are to remain on the site or plot. Note accuracy of the site plan.
2. Service connections: Verify that before a structure is demolished or removed, the owner or agent shall notify all utilities having service connections within the structure such as water, electric, gas, sewer and other connections. A permit to demolish or remove a structure shall not be issued until a release is obtained from the utilities, stating that their respective service connections and appurtenant equipment, such as meters and regulators, have been removed or sealed and plugged in a safe manner. Check all utilities to insure connections are disconnected.
3. Notice to adjoining owners of intent, demolition and excavation: Verify that when a written notice has been given by the applicant to the owners of adjoining each potentially affected lot (not across a street) for notice of building demolition it is at least one week prior to the commencement of work. Then a permit shall be granted for the removal of a building or structure.
4. Other laws: Mention to the demolition contractor that nothing herein contained shall be construed to nullify any rules, regulations or statutes of state or federal agencies governing the protection of the public or workers from health or other hazards. The contractor must follow OSHA, IEPA, IDPH, and other state and federal rules for demolition. The contractor shall contact each agency.
5. Portable fire extinguishers: Verify that all buildings under demolition shall be provided with at least one portable fire extinguisher with a minimum 2-A:20-B:C rating at each exit on all floor levels where combustible materials have accumulated. A portable fire extinguisher with a minimum 2-A:20-B:C rating shall also be provided in every storage and construction shed. Additionally, at least one portable fire extinguisher shall be provided where special hazards, such as flammable or combustible liquid storage, exist.
6. Buildings under demolition: Verify that when the building is being demolished and a standpipe is existing within such a building, such standpipe shall be maintained in an operable condition so as to be available for use by the fire department. Such standpipe shall be demolished with the building but shall not be demolished more than one floor below the floor being demolished.
7. Maintenance: Verify that in case an existing party wall is intended to be used by the person who causes an excavation to be made, and such party wall is in good condition and sufficient for the use of both the existing and proposed building, such person shall preserve the party wall from injury and shall support the party wall by proper foundations at said person's own expense, so that the wall is and remains as safe and useful as the party wall was before the excavation was commenced. During the demolition, the party wall shall be maintained weatherproof and structurally safe by adequate bracing until such time as the permanent structural supports have been provided.
8. Adjoining roofs: Verify that where the demolition of an existing building is being conducted at a greater height, the roof, roof outlets and roof structures of adjoining buildings shall be protected against damage with adequate safeguards by the person doing the work.

9. Removal of debris: Verify that all waste materials be removed in a manner which prevents injury or damage to persons, adjoining properties and public rights-of-way.
10. Grading of lot: Where a structure has been demolished or removed and a demolition permit has not been approved, the vacant lot shall be filled, graded and maintained in conformity to the established elevation of the street grade at curb level nearest to the point of demolition or excavation. Provision shall be made to prevent the accumulation of water or damage to any foundations on the premises or the adjoining property.
11. Retaining walls and partition fences: Verify that the adjoining grade is not higher than the legal level, the person causing an excavation to be made shall erect, where necessary, a retaining wall at his or her own expense and on his or her own land. Such wall shall be built to a height sufficient to retain the adjoining earth, shall be provided with a guardrail or fence not less than 42 inches (1067 mm) in height.
12. Removal of waste material: Verify that material shall not be dropped by gravity or thrown outside the exterior walls of a building during demolition. Wood or metal chutes shall be provided for the removal of such materials. Where the removal of any material will cause an excessive amount of dust, such material shall be wet down to prevent the creation of a nuisance.
13. Lighting: Verify that all stairways and parts of buildings under demolition shall be adequately lighted while persons are engaged at work.
14. Fire department access: Verify that fire department access shall be provided and maintained to all structures undergoing demolition. Fire department access roadways shall be of an approved surface material capable of providing emergency vehicle access and support at all times, and shall be a minimum of 18 feet (5486 mm) in unobstructed width. The access roadways shall provide a minimum turning radius capable of accommodating the largest fire apparatus of the jurisdiction and a minimum vertical clearance of 13 1/2 feet (4115 mm).
15. Security: Verify that the entirety of the demolition site is secure.
